SPLIT-IMAGE

*Transit Included with
Every Lev-L-Lite*

**Lights can be checked both
vertically and horizontally
without removing headlight doors**

- ✓ So accurate headlight beam can be properly aimed to within a quarter of an inch at 25 ft.
- ✓ NO STRINGS BETWEEN THE TWO AIMERS!
- ✓ Revolutionary Split-Image System
- ✓ Replace Troublesome Strings.
- ✓ Easiest method to aim and check the new four-lamp system
- ✓ Comes with adaptors to aim and check large headlamps
- ✓ MEETS S.A.E. REQUIREMENTS!

To insure accurate headlamp aiming, the floor level must be checked; and Hoppy's famous Split-Image Transit, another *plus* with Lev-L-Lite, is the one precision instrument to use. Once you have checked your floor level, you'll find many other practical uses for this versatile tool. It indicates level and measures incline for yard grading and terracing, fencing, surveying, block laying, around-the-house carpentry, and many other do-it-yourself jobs.

More facts about headlight aiming —

Now more profitable, more accurate — with Split-Image Lev-L-Lite

HEADLAMP AIMER

**You get the *Split-Image* Lev-L-Lite Plus the *Split-Image* Transit,
for modern headlight checking through *The Precision of Split Image***

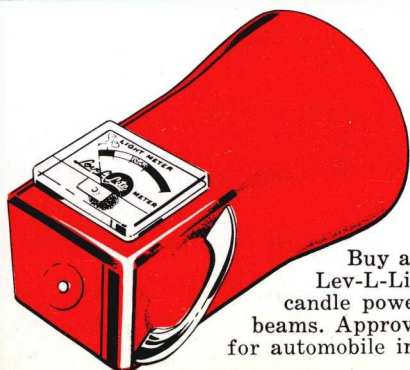

This modern system, developed after two years of research and testing, has proven to be the easiest, most accurate system ever developed.

Thousands of the original Hoppy Lev-L-Lites have been tested in use for over three years. As a result of this experience comes the new Model 130 Split-Image Lev-L-Lite, thoroughly

tested, approved, and being used on automobile production lines where efficient, speedy operation is a "must". Constructed to withstand hard use, this product will serve you long and well and let you offer your customers the latest technological service available today. Adaptor Rings to convert aimer for large headlamps are standard equipment. Booklet explains in easy steps how to check and aim 5 $\frac{3}{4}$ " lamps or, with adaptor rings, 7" lamps.

Now...you can accurately check either 2 or 4-head-lamp systems in less time than it takes to clean the car windows.

**To get
EXTRA
Sealed Beam
SALES:**

Buy and use the Hoppy Lev-L-Lite Meter to detect candle power loss and faulty beams. Approved in most states for automobile inspection stations.

**Ask your jobber for allowance
on your obsolete aimer!**
